Product Manager with 5 years of experience in product and customer success roles at a B2B2C SaaS company serving 100+ municipalities and organizations across North America and Europe, engaging 12M+ residents. Started as a CSM owning about \$2M ARR in client contracts, then was promoted to the company's first Product Manager, owning the platform from discovery to launch with Design and Engineering. Stayed the main client contact, running requirements sessions, roadmap reviews, and QBRs.

EXPERIENCE

Bewith.io | *B2B2C SaaS platform serving 100+ municipalities and organizations across North America and Europe*

Product Manager

Nov 2021 - Oct 2025

- Led a new subscription and multi-entry payment product from discovery to launch, turning messy client and Sales requests into clear requirements and shipping with Engineering to generate \$100K+ in incremental ARR.
- Reduced customer onboarding time by 33% (9 to 6 days) by finding where customers got stuck through interviews and behavioral data, then automating event-based workflows to get them to first value faster.
- Owned client access setup from provisioning to role assignment, turning complex municipal org structures into a roles and permissions model that let clients expand contracts 100%+ into new departments.
- Defined an internal engagement scoring system that Engineering built, then combined its usage data with CS syncs and support tickets to set success metrics and roadmap priorities, driving 18% QoQ usage growth.
- Launched the company's first mobile apps, a resident ticketing app and a staff scanner app, through a phased rollout with post-launch tracking, generating \$55K+ in new revenue.
- Diagnosed a login conversion bottleneck through funnel analysis and shipped a fix through configuration and copy changes alone, without any engineering work, lifting conversion from 40% to 85% and cutting related support tickets by 90%.
- Planned and delivered multi-quarter changes to the CRM and API data model, deciding what to cut or delay to hit dates, making client data more reliable and supporting 30+ contract renewals.

Customer Success Manager

Feb 2021 - Oct 2021

- Increased ARR by 20% by identifying expansion opportunities and upgrading 4 entry-level clients into enterprise-size contracts through structured account reviews and product-led conversations.
- Maintained 100% retention across 30+ accounts by monitoring client health, running proactive check-ins, and resolving issues before they escalated into renewal risks.
- Partnered closely with R&D and Product teams to document recurring client pain points and translate them into actionable product feedback, directly influencing roadmap priorities.

Promoted to Product Manager in under a year based on performance.

Peres Center for Peace and Innovation | *Non-Profit*

Project Manager and Content Developer

Dec 2018 - Dec 2019

- Led a multi-year lecture program with full P&L oversight, budget management, and vendor coordination, delivering all project milestones on time.
- Developed learning strategies, educational content, and workshops for program participants.
